Secutech Vietnam 2026 opens in Hanoi with focus on connected safety and smart infrastructure

Hanoi, 9 September 2026. From AI-powered hazard detection and connected factories to fire prevention, smart buildings, and robot demonstrations, Secutech Vietnam 2026 opens today in Hanoi with a focus on technologies that help protect, manage, and operate urban environments and production facilities more effectively. Taking place from 9 – 12 September 2026 at the Friendship Cultural Palace alongside Fire & Safety Vietnam and SMABuilding, the 19th edition will host 480 exhibiting brands from 16 countries and regions across 13,000 sqm of exhibition space. Representing Bulgaria, China, Germany, Hong Kong, India, Japan, Korea, Malaysia, Singapore, Spain, Switzerland, Taiwan, Türkiye, the UAE, the US, and Vietnam, exhibitors will present solutions spanning safety, security, emergency response, industrial automation, ICT infrastructure, and smart building technologies.

Commenting on the fair, Ms Regina Tsai, General Manager of Messe Frankfurt (HK) Ltd – Taiwan Branch, said: “This year’s edition reflects how safety and security needs are becoming more closely connected with digital transformation, facility management, and industrial modernisation. Across factories, commercial buildings, public facilities and infrastructure projects, end users are looking for solutions that can improve risk prevention, response efficiency, and daily operations at the same time. By bringing these different technology fields together, Secutech Vietnam gives visitors a clearer view of how systems can be planned and applied in real project settings. It also helps suppliers present their solutions in a way that matches the practical needs of Vietnam’s fast-developing market.”

This year’s exhibition will feature a broad mix of international and local suppliers across video surveillance, AI analytics, access control, intrusion detection, network transmission, fire protection, hazard detection, voice evacuation, testing and certification, and digital facility management. Featured brands include Ajax Systems, AMG Systems, Dahua Wisualarm, Dräger, Hanwha Vision, Hikvision, NAFFCO, Network Optix, Nittan, Securiton, Sony, TOA, TVT, UL and VdS. Software and AI solution providers such as Advancis, Bien Ba, Certis, CSA International, emCT, HTI Group, JAON Inc, Sunggeon Engineering and Ventionex Innovations will also present applications covering hazardous zone monitoring, C2 platforms, identity management, system integration, VMS, AI orchestration, forensic video analytics, construction safety, IoT monitoring and mobile facility management.

International participation will be further supported by country and regional showcases, including the Japan Pavilion and Korea Pavilion, which will present fire safety, inspection,

emergency response, rescue, PPE and smart safety technologies. Together with specialist exhibitors and certification bodies, these showcases will help visitors compare solutions for local project requirements and safety standards.

The 2026 fringe programme will place practical application at the forefront, with forums, workshops, and product presentations covering AI and software, factory automation, hands-on sessions for installers, fire prevention, emergency response, and live technology displays. Key highlights include:

- **AI & Software for Intelligent Industries: Accelerating Vietnam's Digital Transformation**
  This business-focused forum will examine how AI, software, cloud, networking, IoT, and intelligent platforms are supporting digital transformation across industrial facilities, commercial buildings and smart cities. The sessions will connect technology providers with end users through discussions on video intelligence, AI data infrastructure, hazard detection, intelligent manufacturing, IT network optimisation, and smart city platforms.

- **SPS Stage Vietnam – Building the Next-Generation Factory: AI, Robotics and Connected Industrial Automation**
  Co-organised by the Ho Chi Minh City Automation Association, this forum will focus on how AI, robotics, industrial automation, and connected factory technologies are transforming Vietnam's manufacturing sector. Topics will include AI and robotics in modern manufacturing, the transition from industrial automation to smart manufacturing, and the development of connected factory ecosystems.

- **Tech Stage**
  Exhibitors will present their latest products, technologies, and solutions through product presentations and live showcases. The platform will give distributors, system integrators, installers, consultants, engineers, project owners, and end users a closer look at new applications across security, fire safety, smart building, AI, and IoT technologies.

- **Industry Installer Workshop**
  Focused on practical learning, the workshop hosted by Nhà An Toàn will offer product knowledge and skills-based training for installers and industry professionals. Sessions will cover AI-powered video surveillance, intelligent object search, AI-managed switch solutions, fire alarm systems, and robot applications for Vietnamese enterprises, helping participants apply new knowledge in installation and project environments.

- **Fire seminar organised by the Fire Association**
  Industry representatives will examine the development of Vietnam's fire prevention, firefighting, rescue, and emergency response sector, with attention to its role in public safety, national security, and social order. The seminar will also consider how fire safety capabilities can support the continued growth of the wider safety and security industries.

- **Dialogue with enterprises and business associations on fire prevention and firefighting**
  This session will address implementation challenges, regulatory requirements, and emergency preparedness, while encouraging closer public-private communication

on improving safety practices across workplaces and facilities.

- **AI & Robotic Display Demo Time**
  Live demonstrations will give visitors a closer look at intelligent machines, automation equipment, and AI-enabled tools in operation. The area is intended to reveal how these technologies can support tasks such as monitoring, inspection, response, and facility management, while allowing direct exchange with solution providers.

Background information on Messe Frankfurt
The Messe Frankfurt Group is the world's largest trade fair, congress and event organiser with its own exhibition grounds. With a workforce of some 2,700 people at its headquarters in Frankfurt am Main and in 29 subsidiaries, it organises events around the world. Group sales in financial year 2025 were about € 766 million. We serve our customers' business interests efficiently within the framework of our Fairs & Events, Locations and Services business fields. One of Messe Frankfurt's key strengths is its

powerful and closely knit global sales network, which covers around 180 countries in all regions of the world. Our comprehensive range of services – both onsite and online – ensures that customers worldwide enjoy consistently high quality and flexibility when planning, organising and running their events.

Messe Frankfurt develops new business models based on its digital expertise. Its range of services encompasses venue rental as well as exhibition stand construction, marketing services, staffing services, and catering.

Sustainability is a central pillar of our corporate strategy. Maintaining a balance between environmental and economic responsibility, social responsibility, and diversity lies at the heart of its approach. For more information, please visit our website at: www.messefrankfurt.com/sustainability

With its headquarters in Frankfurt am Main, the company is owned by the City of Frankfurt (60 percent) and the State of Hesse (40 percent). For more information, please visit our website at: www.messefrankfurt.com
